

EXPLORATION OF DATA

DATA EXPLORATION:

It is the first step of data analysis used to explore and visualize data to uncover insights from the start or identify areas or patterns to dig into more. Using interactive dashboards and point-and-click data exploration, users can better understand the bigger picture and get to insights faster.

WAYS FOR DATA EXPLORATION:

- Manual data exploration methods entail either writing scripts to analyze raw data or manually filtering data into spreadsheets.
- Automated data exploration tools, such as data visualization software.
